

Chemical Feed Stations

Complete ready to use Chemical Feed Stations (CFS) allow you to handle small amounts of liquids and other chemicals without the handling costs and inconvenient disposal of drums. Lightweight, easy to handle, and self contained construction adds to the complete ready to use design. Added features such as molded pump shelves, polyethylene primary tank stands, custom design fittings, and accessories help to individualize any customer's needs. Chemical Feed Stations are constructed from high density crosslink polyethylene or FDA compliant linear polyethylene.

Optional polyethylene stands, which may be stacked 2-high, support the primary tank for gravity feed.

Polyethylene pump shelf supports most pumps and metering devices. Optional fiberglass shelves are available for pumps and metering devices totaling 25 pounds or more.
